UNITED STATES DEPARTMENT OF AGRICULTURE
Agricultural Stabilization and Conservation Service

-FOREWORD-

This report presents in narrative and statistical form the accomplishments of the Michigan Agricultural Stabilization and Conservation Committees in administering farm programs of the United States Department of Agriculture.

In its activities, the agency's primary responsibilities are to promote the national welfare and to carry out the legislative intent of the Congress. They include the improvement of the economic stability of agriculture, the maintenance of an even flow of quality products to market at reasonable prices and the improvement and protection of our soil and water resources.

We hope that this report will be useful to the many persons and organizations who are interested and concerned with the progress of agriculture in Michigan.

We extend our sincere appreciation and thanks to ASC County and Community Committeemen and County office personnel, cooperating agencies and others who have played such an important part in the successful operation of farm programs in 1973.

MICHIGAN STATE ASC COMMITTEE
AND STATE EXECUTIVE DIRECTOR

Issued April, 1974

MICHIGAN STATE COMMITTEE & STATE EXECUTIVE DIRECTOR

William Vanderbeek, (left) Member of the State Committee since April of 1969, operates a 300 acre farm in Gratiot county, producing cash crops. He attended Michigan State University. He was active in FFA and was awarded the American Farmer Degree and the State Farmer Degree for Michigan by the FFA. Mr. Vanderbeek and his wife Grace, who is a teacher in the Alma Middle School, have one son.

Robert D. Zeeb, (right) of Bath, was appointed to the State Committee in March, 1973. Mr. Zeeb operates 780 acres in Clinton county where, since 1956, he has raised a dairy herd and other farm products. He was a board member of the State and County Farm Bureau and the Michigan State Fair, and has been a member of the Michigan Dairy Herd Improvement Association for seven years, serving as president for four years. He studied agricultural subjects at Michigan State University.

Walter Wittenbach, Chairman (center) was appointed to the State Committee on July 11, 1972. Prior to this, Mr. Wittenbach served on the Kent County ASC Committee for 13 years. Mr. Wittenbach and his wife Louise live on a 300 acre farm near Belding. He specialized in dairy farming until 10 years ago when he changed to growing fruits and cash crops. Mr. Wittenbach has been a member of the Pomsters for 10 years and once served as State President. He is a member of the Farm Bureau and the National Association of Farmer Elected Committeemen. He has been a member of the Elks for 25 years.

Dorn Diehl, State Executive Director (standing) and his wife Grace Ann, live in Dansville, Michigan. He has operated a 2000 acre farm, certified seed business, and a farm machinery agency with his brother Dave Diehl and a nephew David Diehl. He also operated a house construction business. He attended Michigan State University. Mr. Diehl was an ASC community committeeman in Ingham County for eight years and has been a long-time cooperator with ASCS farm programs. He was a member of the Board of the Mason General Hospital, a member of the County Agricultural Extension Speakers Bureau and is active in the Dansville United Methodist Church.

ADMINISTRATION OF ASCS PROGRAMS

The Agricultural Stabilization and Conservation Service (ASCS) is the agency of the U. S. Department of Agriculture that administers specified commodity and related land use programs designed for voluntary production adjustment, resource protection, and price, market, and farm income stabilization.

Administration of these programs is accomplished through State, County and Community Committees. These committees are composed of farmers who represent various types of farming in the State. They establish the policies that are within their legal and administrative jurisdiction with respect to the operation of all applicable programs of the U. S. Department of Agriculture at the State and County level.

The Michigan State ASC Committee consists of three members appointed by the Secretary of Agriculture. In addition, the Director of Agricultural Extension Service is an ex-officio member of the committee.

The State Committee is responsible for the administration of farm programs in the State and for general supervision of the work of County Committees. The State Committee appoints a State Executive Director who supervises and directs the work of the State Office staff under policies established by the committee.

Each ASC County Committee has three farmer-members elected by farmer-elected delegates to a county convention. One committeeman is elected each year, with two committeemen being holdovers. The County Agricultural Extension Agent is an ex-officio member of the committee.

Each ASC County Committee employs a County Executive Director who, for the committee, hires the necessary employees for office and field work and sees that the day-to-day office operations are effectively performed. The County Committee, however, is responsible for programs and administrative policies and decisions at the county level.

PART II

RURAL ENVIRONMENTAL ASSISTANCE PROGRAM

The Rural Environmental Assistance Program (REAP) is the successor to the Agricultural Conservation Program. It is the principal channel through which the Federal Government shares with farmers and ranchers, the cost of carrying out approved soil, water, woodland, and wildlife conservation and pollution abatement practices on their land. The program is entirely voluntary and assistance is made available for practices over and above what farmers would carry out with their own resources and on their own initiative.

Technical assistance for permanent type practices are provided by the Soil Conservation Service, U. S. Forest Service and others.

In December, 1972, Washington advised that all USDA programs had been carefully reviewed to identify those programs which could be terminated to assist in curbing government expenditures and to further dampen inflationary trends. As a result of this review, only requests for REAP assistance approved on or before December 22, 1972 could be honored and paid in 1973. This action drastically reduced the number of participating farms and gross expenditures for 1973.

Activity for the past six years is listed below.

YEAR	PARTICIPATING FARMS	TOTAL GROSS EXPENDITURES
1968	25,399	\$ 5,225,082

EMERGENCY CONSERVATION MEASURES

Public Law 85-58 authorizes the Secretary of Agriculture to approve Emergency Conservation Measures for rehabilitation of farmland in States and counties designated as disaster areas. ECM funds may not be used to carry out practices which otherwise would have been approved under REAP or other available programs.

In 1973 the combination of high lake levels and strong winds blowing off Lake Huron caused flooding of farmland in Bay, Saginaw and Tuscola counties. In Midland county, ECM assistance was authorized for removal of debris from farmland caused by a tornado.

PART III

1973 FEED GRAIN PROGRAM

The Agricultural Act of 1970 initiated a cropland set-aside approach for participating producers in the voluntary wheat, upland cotton, and feed grain programs. These programs are designed to help farmers shift to a market-oriented agriculture.

Program goals included those to give farmers more opportunity for decision making on their farms; to protect and improve farmers' income; to keep agricultural production in line with anticipated needs and to put a greater reliance on the market place as the principal source of farm income. Feed grains include corn, grain sorghum and barley, however, barley was not included in the 1971 program.

The 1973 Feed Grain Program offered farmers two plans for determining their level of participation. Under the 10% set-aside plan, feed grain producers were required to set aside 10% of their feed grain base in order to qualify for payment. On the remaining cropland acreage they were free to plant any crop they chose except quota crops. He also had to maintain his conserving base acres.

Those producers who signed up for the zero set-aside plan agreed to accept a reduced payment in order to have all of their cropland except for their conserving base free for planting. They also agreed to limit their feed grain plantings to no more than their 1972 production.

Set-aside payments for a farm were calculated on half of the feed grain base acreage multiplied by the farm yield times the payment rate per bushel. A producer who complied with set-aside and conserving base requirements could receive payments on half of his base acreage whether he planted feed grains or not.

Listed below is a summary of participation by Michigan farmers in the Feed Grain Program for the years 1968-1973.

<u>Year</u>	<u>Participating Farms</u>	<u>Acreage Diverted</u>	<u>Payments</u>	
			<u>Diversion</u>	<u>Price Support</u>
1968	50,300	802,675	\$25,433,311	\$8,422,539
1969	54,624	883,103	27,968,888	8,979,106
1970	53,910	849,905	24,258,541	8,985,220

<u>Year</u>	<u>Participating Farms</u>	<u>Acreage Set-Aside</u>	<u>Payments</u>
1971	65,670	350,534	\$20,261,764
1972	62,441	660,958	34,661,418
1973	63,869	171,952	22,128,207

The Agricultural Act of 1970 changed the basis for determining and identifying program payments.

PART IV

1973 WHEAT PROGRAM

The goals for this program were the same as for the 1973 Feed Grain Program also included in this report.

Participants in the 1973 Wheat Program were not required to set aside land. However, those who elected to set aside acreage voluntarily for additional payment had to set aside an amount equal to 86% of their allotments, in addition to the voluntary acreage (up to 150% of the allotment). Under the voluntary option, his total wheat production was limited.

In addition to devoting his set aside acres to an approved soil conserving use, a participant also had to maintain his conserving base acres.

Participants in the 1973 Wheat Program could receive price support on all their wheat crop but were eligible for wheat certificate payments only on the portion included in their domestic allotment.

WHEAT PROGRAMS 1968 - 1973

<u>Program Year</u>	<u>Participating Farms</u>	<u>Acreage Diverted</u>	<u>Total Payments</u>
1968	42,258	1/	\$16,066,395
1969	61,575	251,618	22,350,310
1970	61,670	434,869	20,523,179

<u>Program Year</u>	<u>Participating Farms</u>	<u>Acreage Set-Aside</u>	<u>Payments</u>
1971	63,992	234,840	\$20,711,118
1972	60,427	256,338	16,069,571
1973	61,873	94,607	9,565,010

1/ The Agricultural Act of 1970 changed the basis for determining and identifying program payments.

PART V

1973 SUGAR PROGRAM

The United States Sugar Program has a three-fold purpose: (1) to protect the welfare of those engaged in the domestic production of sugar; (2) to provide U. S. consumers with ample sugar supplies at reasonable prices; and (3) to promote and strengthen the export trade of the United States.

Payments are conditioned on the observance of acreage controls when needed, nonemployment of child labor, payment of fair wages to workers, and payment of fair prices for sugar crops purchased from other producers.

Payments to producers are financed out of the general funds of the Treasury. However, sugar taxes on all sugar marketed within the quota system provide funds which more than offset all costs of the program.

The program also gives limited benefits to growers through special conditional payments for crop deficiency or abandonment caused by natural disasters such as drought, flood, storm, freeze, disease or insects.

Activity for the years 1968-1973 is summarized below.

<u>Year</u>	<u>Number of Applications</u>	<u>Acres Planted</u>	<u>Tons of Beets Marketed</u>	<u>Cwt. Sugar Produced</u>	<u>Total Payments</u>
1968	2,375	90,946	1,708,311	4,744,920	\$3,790,202

PART VI

LAND RETIREMENT PROGRAMS

These programs provide for shifting cropland presently not needed for agricultural production into conservation, recreational and open space use. Participants receive adjustment payments related to the value of crops normally produced on the land.

The Cropland Adjustment Program which included (Greenspan), authorized in 1965 was offered on only a limited scale during 1966 and 1967 with agreements entered into for periods up to 10 years. The Greenspan provision provided for more open space and other recreational opportunities for urban areas.

In 1973, 1,329 farms were enrolled in the Public Access feature of the Cropland Adjustment Program to allow hunting, hiking and fishing. This provided a total of 73,462 acres of added open space for public use. Two-thirds of these agreements were in the lower third of the State where there was the greatest demand by the public for open space.

The Public Access Program provided a great resource at the least cost of any recreational program tried heretofore. The farmer and urban people share a mutual interest in the program. Anyone may obtain a list of the farms open to the public for the above uses by contacting the State or County ASCS Office.

A summary of acreage and payments for the Cropland Adjustment Program is shown on the following pages.

PILOT PUBLIC ACCESS UNDER THE 1973 SET-ASIDE PROGRAMS

Farmers in 50 counties in 10 states across the United States were offered the opportunity in 1973 to receive payments for permitting the public to hunt, fish or hike on their land. To be eligible for a public access agreement, a farmer had to be participating in a set-aside program. The money farmers received under this Pilot Public Access Program was in addition to their regular payments for setting aside part of their crop acres. A sliding payment scale was used according to the rating of the land as game habitat.

Activity for 5 Michigan counties is shown below.

PART VII

COMPLIANCE AND AERIAL PHOTOGRAPHY

The Compliance and Aerial Photography Division is responsible for obtaining acreage determinations and checking compliance of farmers under various ASCS farm programs. Compliance is determined in two ways: one method is called producer certification, the other method is an on-farm inspection measurement by farm reporters.

The certification method consists of farmers visiting the county office and certifying compliance with their program intentions. Photocopies are used in certifying compliance. They are exact reproductions of aerial photo enlargements on file in the county office.

If the producer wishes to know the exact acreage of a given area he may obtain this information by requesting measurement service. This service is provided by the county ASCS office at a nominal charge.

Aerial photographs for any given area in Michigan may be purchased by the public through the State or County ASCS office.

PART VIII

PRICE SUPPORT PROGRAM

Price support is achieved through loans, purchases and payments for eligible commodities, all at announced levels. Legislation was designed to make some export commodities more competitive in world markets through market price support at or near world price levels. At the same time, grower's incomes are protected by supplementary price support payments, and -- in the case of wheat -- issuance of wheat marketing certificates which bring returns to participating growers to full parity on the domestically-consumed portion of the crop.

For most commodities, loans are made directly to producers on the unprocessed commodity through ASCS county offices. Smaller amounts of grains are also purchased from producers.

Loans are available for periods of six to eight months following harvest. Depending on the commodity, loans generally mature one month following the end of loan availability. Purchases from producers are made at the time of loan maturity for the crop.

Price support loans to producers are "nonrecourse." With this type of loan, producers are not obligated to make good any decline in the market price of the commodity they have put up as collateral. If market prices rise above support prices, producers can pay off their loans and market their commodity. If market prices fail to rise above support prices, producers can deliver the commodity to CCC, with appropriate adjustments for quality and quantity, and discharge their obligation in full.

Support loans and purchases give farmers a ready means of promoting more orderly marketing, particularly in periods when bountiful harvest supplies threaten to push prices of farm commodities down to unfair levels.

In recent years farmers also have been able to continue their loans on certain grains in farm storage beyond the first year, earning storage payments during the announced loan extension (reseal) period.

1972 PROGRAM YEAR
QUANTITY OF EACH CROP PLACED UNDER LOAN, DELIVERED TO CCC AND PURCHASED

PART IX

DAIRY INDEMNITY PROGRAM

The indemnity payment program authorized under the 1970 Agricultural Act was extended to December 31, 1977 by the Agriculture and Consumer Protection Act of 1973. The program provides indemnity payments to eligible dairy farmers whose milk is removed from the market because of pesticide residue content and to manufacturers of dairy products who have been directed to remove their dairy products because of pesticide residues. The law also provides authority for indemnity payments for dairy cows destroyed because of pesticide residue.

In September, 1973, the milk from cows owned by three dairymen in Berrien County and three in Van Buren County was found to contain high levels of pesticides Dieldrin and DDT. In October, 1973, two in each county had been reinstated when the milk test by the State Department of Agriculture showed pesticide residues reduced below permitted tolerances. One dairyman from Van Buren County sold his dairy herd. As of December 31, 1973, one dairyman from Berrien County had not been reinstated because pesticide residue was still above permitted tolerances. Continued efforts were being made by the dairyman to eliminate the source of contamination and bring his milk supply to acceptable tolerances.

Payments under the Dairy Indemnity Program were made during 1973 as follows:

<u>County</u>	<u>No. of Producers</u>	<u>No. of Applications</u>	<u>Total Payment Approved in 1973</u>
Berrien	3	3	\$2,597.87
Van Buren	<u>1</u>	<u>1</u>	<u>2,393.16</u>
Total	4	4	\$4,991.03

PART X

BEEKEEPER INDEMNITY PAYMENT PROGRAM

The indemnity payment program authorized under the 1970 Agricultural Act was retroactive to 1967. This program was extended through December 31, 1977 by the Agriculture and Consumer Protection Act of 1973. To be eligible for payments, beekeepers must file applications with their county ASCS office and must prove loss of or damage to honeybee colonies due to pesticides. A beekeeper filing for payment must satisfy the following requirements in written form:

1. Show that his own pesticide application, if any, in no way contributed to his bee losses,
2. That he took reasonable care to protect his bees if he had prior notice of pesticide use in the vicinity,
3. That he did all he could to reduce losses after the bees were exposed,
4. The loss was due entirely to the use of pesticides, and
5. Extent of damage, i.e., destroyed, severely damaged or moderately damaged.

Claims for indemnity payments could be filed on the basis of a loss of income proven by actual business records or on a flat rate basis. Rates for losses filed on a "flat rate" basis were authorized as follows:

Extent of Loss	For Losses Sustained	
	Before June 10, 1972	After June 9, 1972
Colony destroyed	\$20.00	\$15.00
Colony severely damaged	15.00	10.00
Colony moderately damaged	5.00	5.00
Queen nucleus destroyed	7.50	5.00
Queen nucleus severely damaged	5.00	no payment

Thirteen beekeepers reported losses of bees due to pesticides in 1973. These beekeepers have until April 1, 1974 to file indemnity claims with the county ASCS office.

PART XI

FARM STORAGE AND DRYING EQUIPMENT LOAN PROGRAMS

Under this program eligible farmers can obtain Commodity Credit Corporation (CCC) loans from their county ASCS offices to finance on-farm storage and drying facilities needed for grain and other commodities. Adequate on-farm storage and drying capacity enables a farmer to do a better job of utilizing his crops and lessens the possibility of his getting caught in a transportation bottleneck or in a market glut.

Prior to September 17, 1973 these loans were available for up to 85% of the total cost of the facilities. They are repayable in four equal installments over a period of five years.

Effective September 17, 1973 the program was modified to increase the down payment requirement from 15% to 30% and the interest rate per annum was changed from 6% to 8 3/4%.

PART XII

COMMODITY CREDIT CORPORATION OWNED GRAIN STORAGE

The Grain Storage Program in Michigan as of December 31, 1973 covered the operation of five binsites. These binsites contained 439 silo-type steel bins, 12 quonset-type steel structures and one wood storage structure with a total rated capacity of 1,928,405 bushels.

During 1973 a total of 663 bins were sold which resulted in the closing of 8 binsites in 5 counties. There were no CCC owned commodities in store in Michigan during 1973, however, 169,000 bushel of the storage capacity was rented to farmers.

PART XIII

WOOL AND MOHAIR PROGRAM

The National Wool Act of 1954, provides that support of the prices for wool and mohair may be carried out through payments to producers.

The Agricultural Act of 1970 amended the National Wool Act to establish for the three marketing years beginning January 1, 1971, and ending December 31, 1973, the support price for shorn wool at 72 cents per pound, grease basis, and the support price for mohair at 80.2 cents per pound, grease basis.

The program is designed, through use of annual payments, to support the returns to producers from wool and mohair.

The total amount of payments under the program is limited to 70 percent of the accumulated totals of duties collected on imports of wool and wool manufactures.

Marketing Year	: Average Price : Received Per : Pound - Wool	: RATES OF PAYMENT			: *Total : Payments
